

Your Complete Security Awareness Solution

EXECUTIVE SUMMARY

Information attacks are more frequent and sophisticated than ever before. Often, the easiest way to attack your organization is through your employees. Our comprehensive Security Awareness program addresses everything you and your organization needs to help educate and protect your employees against these threats.

OUR UNIQUE VALUE

We go beyond just online training and provide the most extensive program possible. Our trainers have over ten years experience in information security and are renowned around the world for their expertise, presentation skills and publications. We have worked in over twenty different countries and organizations such as the FAA, Department of Defense and Etisalat Telecommunications. Our approach is to teach and motivate your employees by demonstrating why security is important, how threats work, and how they can protect themselves and your organization. In addition, we customize our solution to meet the unique needs of your organization. We work with you to understand and seamlessly integrate your business model and security policies. We also modify our package to the culture of your organization, including providing materials in foreign languages.

HoneyTech are the leading experts in security awareness training. Their comprehensive program meets all of our needs and more. I cannot recommend them enough."

- Ahmad Alkamali, Etisalat Network & Information Security

YOUR COMPLETE SOLUTION

Awareness is not a one-time event but a continuing process of education. Our Security Awareness package addresses all of your needs, is ISO 27000, Sarbanes Oxley and COBIT compliant, and includes:

1. **Strategic Rollout Plan:** Our team, including PMP certified management, will work with you to customize a year long strategic project management plan for your organization.
2. **Onsite Awareness Seminars:** Our world renowned experts will have tremendous impact on your employees as they show step by step how threats are targeting them, the tactics they use, and how they can protect themselves.
3. **Online Awareness Training:** Our courses can be hosted by us or installed on your own SCORM or AICC compliant LMS. The courses are role based with seven different modules to choose from.
4. **Language Customization:** Your program can be customized to any language you need. Awareness materials, online training, and native speakers can all be in the local language of your choice.
5. **Weekly Security Awareness Updates:** Every week you and your organization will receive email updates outlining the latest awareness attacks and what your organization can do about them.
6. **Monthly Awareness Penetration Testing:** Once a month we will attempt many of the same attacks threats are using, such as phishing. We track how many employees pass and fail these tests, giving you metrics to track your awareness program.
7. **Train The Trainer:** We work with your security team to build and implement your own training programs.
8. **Awareness Material:** We provide awareness posters, monthly newsletters, screen savers and can customize other materials on request.
